DETAILED ACTION

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "rolling" and "joining" step of claim 13 should be shown or the feature(s) canceled from the claim(s). No new matter should be entered. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. Claims 1-12, 18, and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 1 and 8, the limitation, "said shaping die subject to pressurize" is awkward and indefinite and fails to clearly set forth applicants' disclosed invention. In claim 6 and 11, the limitation, "adapted to bend through a bending process" is awkward and unclear and hence rendering the claim indefinite. In claims 7 and 12, the limitation, "to a shape of at least one automobile body component" fails to positively recite structure so as to clearly set forth the metes and bounds of the claim. In claim 18, the limitation, "forming said bow tie shaped blank to a die" is unclear in meaning; it is not clear whether the work is formed to the shape of the die or literally to a die. Finally in claim 19, "metal forming" lacks clear antecedent basis.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by Morita et al., Fig.

3A. Morita et al. teaches the claimed part having a smaller central portion in cross-section than its ends.

4. Claims 13-17 are allowable.

5. Claims 1-12, 18, and 19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
